DATE OF AUDIT

6th March 2024

BSI AUDITOR

Sergio Cerquetti, FIA Environmental Accreditation Auditor

ACCREDITATION LEVEL

3-Star (Fast-track)

AUDIT TYPE

Renewal

SUMMARY:

The “*Autodromo Internazionale Enzo e Dino Ferrari*” (hereinafter “Autodromo di Imola”) applied for the renewal of the FIA three-star environmental accreditation on the 12th of February 2024.

The organisation supported their application with documents such as:

- The ISO 14001:2015 Certificate No. 50 100 16888, valid until 14th February 2026
- The ISO 20121:2013, Certificate No. 50 100 16919 valid until 24th February 2026
- The FIA Environmental Accreditation Programme Renewal Form.
- A set of documents from the organisation’s EMS such as the Sustainability Policy, the Environmental Objectives and Targets register, the relevant impact areas register and the continual improvement plan.
- Director's e-mail reply to the FIA Auditor's inquiry on I-17 area (Carbon Management).

The auditor confirmed the validity of both certifications on the Italian Accreditation Body (Accredia) which confirms the applicability of the FIA fast-track procedure.

The scope of the organisation reported on both ISO certifications is related to the “*Management of Autodromo Internazionale Enzo e Dino Ferrari as location for sustainable events: sporting and motor sport events, conferences, courses and training, photo and video shooting*”

Overall, the documents sent to the FIA clearly demonstrate the strong top-management commitment towards the environment.

Within a flat corporate organisation, the Autodromo di Imola’s integrated management system has demonstrated to be robust and able to effectively identify, monitor, and relentlessly improve its environmental performance while fostering a culture of environmental responsibility and sustainability (across all levels of the organization).

In conclusion, **the FIA Environmental Auditor recommends the organisation “Autodromo Internazionale Enzo e Dino Ferrari” be awarded with the renewal of the FIA Three-star environmental accreditation.**

However, the Auditor highlighted one recommendation (opportunity for improvement) that will need to be addressed prior to the next renewal audit, relating to the carbon emissions area of the FIA's three-star environmental accreditation.

RECOMMENDATION:

1. In order to meet the I-17 requirement of the FIA 3 Star Environmental Accreditation, it is recommended that Autodromo di Imola improves its greenhouse gas calculations (Scopes 1, 2 and 3) and integrates them into its environmental management system. It is also recommended that the organisation develops targeted emission reduction strategies.

Next audit: March 2026
